DETAILED ACTION

Notice to Applicant

1. This communication is in response to the Remarks filed 9/17/09. Claims 21-45 are pending.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:
Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.
3. Claims 25-45 are rejected under 35 U.S.C 101 because the claimed invention is directed to non-statutory subject matter.

Claims 25-45 are rejected under 35 U.S.C. §101 because the claimed invention is directed to non-statutory subject matter. Based on Supreme Court precedent¹ [1] and recent Federal Circuit decisions, § 101 process must (1) be tied to another statutory class (such as a particular apparatus) or (2) transform underlying subject matter (such as an article or materials) to a different state or thing.²[2] If neither of these requirements is met by the claim(s), the method is not a patent eligible process under 35 U.S.C. § 101. In addition, the tie to a particular apparatus, for example, cannot be mere extra-solution activity. See *In re Bilski*, 88 USPQ2d 1385 (Fed. Cir. 2008).

¹[1] *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876).

²[2] The Supreme Court recognized that this test is not necessarily fixed or permanent and may evolve with technological advances. *Gottschalk v. Benson*, 409 U.S. 63, 71 (1972).

An example of a method claim that would not qualify as a statutory process would be a claim that recited purely mental steps.

To meet prong (1), the method step should positively recite the other statutory class (the thing or product) to which it is tied. This may be accomplished by having the claim positively recite the machine that accomplishes the method steps. Alternatively or to meet prong (2), the method step should positively recite identifying the material that is being changed to a different state or positively recite the subject matter that is being transformed.

In this particular case, claims 21-45 fails both prong (1) because the "tie" (e.g. receiving, communicating, allowing and allowing steps are representative of extra-solution activity and/or not tied to any particular machine or apparatus. Additionally, the claim(s) fail prong (2) because the method steps do not transform the underlying subject matter to a different state or thing. Accordingly these claims are directed to non-statutory subject matter.

In addition, the Examiner suggests Applicant to look at page 28 of the specification for meaning of the machine -readable medium which can also be a "carrier -wave signal" and is not statutory subject matter. See *In re Nuijten*, Docket no. 2006-1371 (Fed. Cir. Sept. 20, 2007) (slip. op. at 18) ("A transitory, propagating signal like Nuijten's is not a 'process, machine, manufacture, or composition of matter.' ... Thus, such a signal cannot be patentable subject matter."). Appropriate correction is needed.
